Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

## Listing of Claims:

## 1-13. (Canceled)

14. (Amended) A method for detecting antibody to FIV in a sample comprising: providing a sample;

providing an isolated Feline Immunodeficiency Virus (FIV) envelope polypeptide that cross-reacts with reacts specifically with a monoclonal antibody that is specific for the FIV envelope protein gp130, in the presence of a gp-130-specific monoclonal antibody;

reacting the sample with the polypeptide by incubating the sample with a mixture comprising the polypeptide

and

detecting a reaction between the polypeptide and antibody in the sample.--

15-16. (Withdrawn)

- 17. (Amended) The method assay device of any one of claims 14-16 19 in which the reagent comprises a binding moiety that binds to sample antibody reacted with the polypeptide.
- 18. (Previously Presented) The method of claim 17 in which the binding moiety is attached to a color-producing moiety.
- 19. (Amended) An assay device for detecting antibody to FIV in a sample comprising:

an isolated Feline Immunodeficiency Virus (FIV) envelope polypeptide that <u>cross-reacts</u> with reacts specifically with a monoclonal antibody that is specific for the FIV envelope protein gp130, in the presence of a gp-130-specific monoclonal antibody; and

at least one reagent for detecting a reaction between the polypeptide and antibody in the sample.

## 20-21. (Canceled)

- 22. (Previously Presented) The device of any one of claims 19-21 in which the reagent comprises a binding moiety that binds to sample antibody reacted with the polypeptide.
- 23. (Previously Presented) The device of claim 22 in which the binding moiety is attached to a color-producing moiety.
